Planning Logic

- ⌘ A Sprint is a fixed period in which the team works to complete a selected set of tasks.
- ⌘ An Epic is a large requirement or project that is broken down into smaller Stories.
- ⌘ A Story is a small, manageable requirement that forms part of an Epic.
- ⌘ A Story Point represents the effort required to complete a Story.
- ⌘ Story Point scale used: 1 – Very Easy, 2 – Normal, 3 – Moderate, 5 – Difficult.

Sprint 1

Data Preparation (Epic 1)

- ⌘ Preparing Spreadsheet Data (USN1) 2
- ⌘ Checking Column Names and Data Types (USN2) 1

Import Set Creation (Epic 2)

- ⌘ Creating Import Set Table (USN3) 3
- ⌘ Uploading Spreadsheet Data (USN4) 3
- ⌘ Validating Imported Records (USN5) 3

Total Story Points in Sprint 1 = 2 + 1 + 3 + 3 + 3 = 12

Sprint 2

Transform Map Configuration (Epic 3)

- ⌘ Creating Transform Map (USN6) 2
- ⌘ Mapping Source and Target Fields (USN7) 2
- ⌘ Configuring Field Transformations (USN8) 2
- ⌘ Testing Transform Map (USN9) 4

Import Validation & Reporting (Epic 4)

Import Data using Transform Maps (Spreadsheet)

1

- ⌘ Handling Import Errors and Logs (USN10) 5

Documentation (Epic 5)

- ⌘ Preparing Transform Map Documentation (USN11) 5

Total Story Points in Sprint 2 = 2 + 2 + 2 + 4 + 5 + 5 = 20

Total Story Points

Sprint 1 = 12

Sprint 2 = 20

Velocity = Total Story Points Completed / Number of Sprints

Total Story Points = 12 + 20 = 32

Data Preparation (Epic 1)

- Preparing Spreadsheet Data (USN1) 2
- Checking Column Names and Data Types (USN2) 1

Import Set Creation (Epic 2)

- Creating Import Set Table (USN3) 3
- Uploading Spreadsheet Data (USN4) 3
- Validating Imported Records (USN5) 3

Total Story Points in Sprint 1 = $2 + 1 + 3 + 3 + 3 = 12$

Sprint 2

Transform Map Configuration (Epic 3)

- Creating Transform Map (USN6) 2
- Mapping Source and Target Fields (USN7) 2
- Configuring Field Transformations (USN8) 2
- Testing Transform Map (USN9) 4

Import Validation & Reporting (Epic 4)

Import Data using Transform Maps (Spreadsheet)

1

- Handling Import Errors and Logs (USN10) 5

Documentation (Epic 5)

- Preparing Transform Map Documentation (USN11) 5

Total Story Points in Sprint 2 = $2 + 2 + 2 + 4 + 5 + 5 = 20$

Total Story Points

Sprint 1 = 12

Sprint 2 = 20

Velocity = Total Story Points Completed / Number of Sprints

Total Story Points = $12 + 20 = 32$

Number of Sprints = 2

Velocity = $32 / 2$

Velocity = 16 Story Points per Sprint

Project Summary

This project focuses on importing spreadsheet data into ServiceNow using Import Sets and Transform Maps. The work includes preparing spreadsheet data, creating an Import Set, configuring a Transform Map, mapping source fields to target fields, validating the imported records, handling errors, and documenting the process.
